

LIVING IN HARMONY, LIVING **green**

LIVING GREEN IS A LIFESTYLE CHOICE;
A DESIRE TO **LIVE IN HARMONY** WITH
ENVIRONMENTAL VALUES WHILE
ELEVATING MODERN LIVING STANDARDS

REGENT PARK - A "LEEDING" COMMUNITY

The entire Regent Park Community is being built to LEED® Gold Certification Standards.

TAP INTO COMMUNITY ENERGY

The Regent Park Central Energy System generates heating and cooling for all buildings within Regent Park.

GREEN FROM THE TOP DOWN

All new high-rise buildings within the Regent Park Revitalization will be finished with a lush green roof, which helps to keep Toronto cool in the summer months.

URBAN AGRICULTURE

Gardening plots throughout the community allow people to grow organic food while getting to know their neighbours.

WHEELS TO SHARE

BIXI Toronto has two bike stations within Regent Park, making it easy to get around on two wheels rather than four. Plus, throughout the community residents have access to car share programs.

PLUGGED INTO PARKING

Electric car ready, residents within the Regent Park Community will have the opportunity to utilize recharging stations for electric cars.

DISCOVER "REGENT PARK" - A SIX-ACRE PARK

This brand new six-acre park, called Regent Park, features gardening plots, a community oven, a greenhouse as well as an off-leash dog park, recreational play areas and much more.

Speak with a Sales Representative to learn more about our Environmental Values within the Regent Park Community.
